Career Objective

Flutter Developer with hands-on professional experience in building and maintaining cross-platform mobile applications using Flutter, Dart, REST APIs, Firebase, and modern state management solutions. Experienced in developing responsive UIs, integrating third-party services, and working with production-ready applications.

Technical Skills

Languages: Dart, Swift, Java, Python, JavaScript, Kotlin, PHP

Mobile: Flutter (Android & iOS), Responsive UI, Figma-to-Code

State Management: GetX, Provider, Bloc

Backend & Storage: Firebase, REST APIs, Socket.io, SQLite, Hive, SharedPreferences, GetStorage

Real-Time & Maps: WebRTC, Agora, Audio/Video Calling, Google Maps API, Sensor APIs

Payments & Auth: Stripe, In-App Subscriptions, , Google Sign-In, Apple Sign-In

Tools & Practices: Git, GitHub, CI/CD, Android Studio, VS Code, Postman, Figma, Agile

Experience

Flutter Developer

Oct 2025 – May 2026

SparkTech Agency, Mohakhali, Dhaka

- Developed and maintained production-level cross-platform mobile applications for Android and iOS using Flutter and Dart.
- Integrated RESTful APIs and third-party services, and worked with Firebase (Authentication, Firestore, FCM) to deliver seamless, real-time functionality.
- Architected scalable, maintainable codebases using GetX and BLoC state management while following Clean Architecture principles.
- Applied scalable UI architecture, contributing collaboratively with UI/UX designers and backend engineers in an Agile, cross-functional environment.

Projects

FamilyApp — Family Management System

▶ Play Store 🍏 App Store

Flutter | GetX | Provider | Family-Based Access Control

- Built a family productivity app centralizing task management, shared calendar, meal planning, and notes into a single household dashboard.
- Developed family-based authentication with teen invite and username login flows for secure multi-member access.
- Implemented priority-based task assignment and tracking, plus weekly meal planning with category-wise grocery list generation.
- Built a notes module supporting text and voice notes with search, alongside a custom reusable design system.

Wuffoos — Pet Care & Sitter Platform

▶ Play Store 🐙 GitHub

Flutter | REST API | GetX | OAuth | Multi-language

- Dual-role platform (Pet Owner / Sitter) with seamless profile-switching.
- Real-time earnings dashboard and calendar-based booking lifecycle management.
- Multi-language (EN/ES) and OAuth login via Google, Apple, and Facebook.

Ayúdame — Multi-Service Platform

▶ Play Store 🐙 GitHub

Flutter | Dart | REST API | Firebase | Provider

- Developed a multi-service platform connecting users with service providers, business owners, and event managers in a unified ecosystem.
- Built real-time service booking and management features with seamless API integration for scalable user interactions.

Umrah & Hajj Pilot — GPS Tracking App

 APK Release  GitHub

Flutter | Kotlin | Google Maps SDK | Activity Recognition API

- Built a real-time GPS tracking app with background location logging and Google Maps route visualization.
- Implemented activity detection (walking, running, driving) using Android's Activity Recognition API.
- Optimized battery usage with configurable location update intervals and smart connectivity handling.

HerFitness — Fitness & Trainer Booking App

 APK Release  GitHub

Flutter | Dart | REST API | In-App Wallet

- Designed dual-role (Member/Trainer) onboarding with identity verification and custom profile setup.
- Built trainer discovery and booking screens supporting both online and in-person sessions.
- Developed an in-app wallet and payment dashboard with transaction history and health assessment modules.

Jonssony — EMDR Psychology App

 APK Release  GitHub

Flutter | Dart | In-App Subscription | Audio/Haptics

- Developed an EMDR (Eye Movement Desensitization & Reprocessing) therapy app with guided bilateral stimulation for trauma and anxiety management.
- Built a freemium model with a free tier (guided EMDR sessions, breathing exercises, grounding practices) and a premium subscription unlocking advanced tools.
- Implemented full multi-sensory bilateral stimulation in premium — advanced visual light-bar patterns, 3D spatial bilateral audio, and haptic feedback — with adjustable speed, color, and motion controls.
- Integrated AI-driven mood insights to track users' emotional journey over time.

Naibirly — Service Marketplace Platform

 APK Release  GitHub

Flutter | GetX (MVVM) | REST API | OTP Auth | GetStorage

- Built a dual-user marketplace with distinct Customer (discovery, booking, notifications) and Provider (gig setup, rate config, team/employee management) workflows.
- Implemented reactive MVVM architecture with GetX for real-time order status, notifications, and clean dependency injection.
- Developed category-based service search/filtering with CachedNetworkImage-optimized provider portfolios.

Avishal — Aircraft Audit System

 APK Release  GitHub

Flutter | Dart | Role-Based Access Control | PDF Reporting

- Implemented role-based permission management with off-canvas forms for granular, checkbox-driven feature access control.
- Built role-filtered dashboards and tab views (Home, Audit, Report) shown per user permission (Inspector, Auditor, Admin).
- Developed flight schedule audit forms with departure/arrival time tracking and manual field inputs.
- Built submission history search and filtering by departure or flight number for historical audit lookup.

Plant Monitoring System — IoT

 APK Release  GitHub

Flutter | Dart | Firebase Realtime DB | NodeMCU (ESP8266) | IoT

- Developed a real-time plant monitoring system using IoT and mobile application integration.
- Integrated soil moisture sensors to monitor plant health accurately.
- Implemented both manual and automatic motor control through the mobile app.
- Used Firebase Realtime Database for live data updates and device communication.

Education

Bangladesh University of Business and Technology

May, 2026

Bachelor of Science in Computer Science (CGPA: 3.06 / 4.00)

Dhaka, Bangladesh

- **Relevant Coursework:** Data Structures, Algorithms, Machine Learning, Database Systems
- **Project:** Kidney Stones Detected by CT Scan Images using Machine Learning Model

Netrakona Govt. College

2018 – 2020

Higher Secondary Certificate (HSC), GPA: 4.83

Netrakona, Mymensingh

Dutt High School

2018

Secondary School Certificate (Science), GPA: 4.78
