Education

Bangladesh University of Business and Technology

April, 2026

Bachelor of Science in Computer Science (Current CGPA: 3.06 / 4.00)

Dhaka, Bangladesh

- **Relevant Coursework** : Data Structures, Algorithms, Machine Learning, Database Systems
- **Project** : Kidney Stones Detected by CT Scan Images using Machine Learning Model

Experience

SparkTech Agency

Oct 2025 – Present

Flutter Developer

Mohakhali, Dhaka, Bangladesh

- Developed cross-platform mobile applications using Flutter (Dart) with responsive and adaptive UI.
- Converted Figma designs into pixel-perfect Flutter layouts, ensuring consistency across Android and iOS devices
- Implemented state management (GetX, Provider) for scalable and maintainable code.
- Collaborated with backend teams to integrate APIs, improving user experience and performance

Technical Skills

Programming Languages: Dart, Java, Python, C, C++, JavaScript

Frameworks & Tools: Flutter, Android Studio, Postman, Figma, Git

Databases: Firebase, GetStorage, MySQL

Other: Responsive Pixel Perfect Design, Figma-to-Code, REST API, Fast API, Agile Methodologies

Projects

FamilyApp - Family Management System | REST API, JWT, Role-Based Auth, Local Storage

[Play Store Link](#) | [GitHub](#)

- Built a mobile application to centralize household planning and family organization.
- Implemented shared calendar for event tracking and advanced task management for chores.
- Developed meal planning features with automated grocery list generation.

Wuffoos – Pet Care & Sitter | Flutter, Dart, Role-Based Auth, REST API, GetX

[Play Store Link](#) | [GitHub](#)

- Developed a dual-interface mobile application with a seamless profile-switching feature for both Pet Owners and Pet Sitters.
- Built a comprehensive earnings dashboard for sitters to track total income, monthly revenue, and pending payments with real-time data.
- Integrated a calendar-based booking system to manage the lifecycle of services, including dog walking, boarding, and day care.
- Implemented multi-language support (English/Spanish) and secure authentication via Google, Apple, and Facebook.

Ayúdame – Multi-Service Platform | Flutter, Dart, REST API, Firebase, Provider

[Apk Link](#) | [GitHub](#)

- Developed a multi-service platform connecting users with service providers, business owners, and event managers in a unified ecosystem.
- Built real-time service booking and management features with seamless API integration for scalable user interactions.
- Enhanced user experience with responsive UI design, secure authentication, and streamlined navigation across multiple service categories.

Plant Monitoring System (IoT) | Flutter, Dart, Firebase Realtime DB, NodeMCU (ESP8266), IoT

[Apk Link](#) | [GitHub](#)

- Developed a real-time plant monitoring system using IoT and mobile application integration.
- Integrated soil moisture sensors to monitor plant health accurately.
- Implemented both manual and automatic motor control through the mobile app.
- Used Firebase Realtime Database for live data updates and device communication.
